

MAG

Full face masks MAG/MAG-4

For more than 10 years MAG masks have been protecting workers of industrial enterprises engaged in conditions of high air pollution level from a various number of factors, such as: harmful gases and vapors, aerosols (dust, smoke, fog), or their combinations.

MAG series full face masks are used with DOTpro filters in plastic version and DOT filters in metal version with thread connection.

Technical data

Name	Size	Material	Connection type	Filters attached	Warranty shelf life	Certification
MAG	One universal size	rubber	Thread EN 148-1	DOTpro, DOT	10 years	EN 136 Class 2
MAG-4		silicone				

We have been developing and manufacturing filters and absorbers for them for 80 years; more than 40 patents have been registered in the field of activated carbon technologies.

Thread filters are used completed with MAG series full face masks.

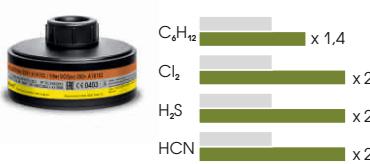

DOT and DOTpro filter lines

Filter name	Absorber capacity	Filter type, efficiency class					Connecting hose availability in the gas mask set
DOTpro	150	A1P3 RD	K1P3 R D	A1B1E1P3 RD	A1B1E1K1P3 RD		-
	250	A2	K2	A1B1E2	A1B1E1K1		-

DOT M	460				A1B1E1K2 + protection from CO		-

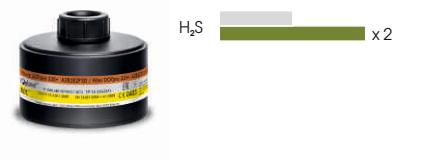

Our special offer: prolonged breakthrough time

1. DOT and DOTpro filters have extended breakthrough time in comparison with the requirements of EN 14387 standard (data provided below)
2. Reusable filters for protection against carbon monoxide (DOT M 460) and nitrogen oxides (DOTpro M 600)
