

ISOLATING FACEPIECE MP-3 (MP-3W)

Isolating facepiece MP-3 is designed to protect eyes, face and head skin against hazardous substances in accident conditions (3rd class). It provides wide field of vision and the possibility to communicate with help of communication system.

Mounting of the mask

- convenient adjustment in six points and reliable fixation

Housing of the mask

- compatibility with other PPE

Panoramic glass made of flexible polymer material

- field of vision is more than 70%
- safety under mechanical influences
- resistance to shock loads
- no deformation

Inner mask

- prevents fogging of the glass
- reduces the carbon dioxide content in the inhaled air

Mounting of the filter

- left or right threaded connection of the filter

Speech device

- speech intelligibility when giving commands
- opportunity to work with means of communication

Water inlet

- possibility to drink water in the contaminated atmosphere

WEIGHT
450 g

2 SIZES:
1, 2

OXYGEN CONCENTRATION
IS NO LESS THAN 18%

+40°C
-40°C

Technical characteristics

The inward leakage under the facepiece while checking by a nephelometric method mustn't exceed, %	0,0001
Resistance to the air flow of the facepiece by inhalation when the constant air flow is (30+/-1) dm ³ /min, Pa	29,4
